Code No: R05220501 **R05** **Set No. 2**

II B.Tech II Semester Examinations,December 2010
SOFTWARE ENGINEERING
Common to Information Technology, Computer Science And Engineering, Computer Science And Systems Engineering

Time: 3 hours **Max Marks: 80**

Answer any FIVE Questions
All Questions carry equal marks

⋆⋆⋆⋆⋆

1. (a) What is meant by use case description? Explain with an example. [6]
   (b) What is Architectural design? State and explain the three layers in the weather station software. [10]
2. (a) Differentiate between usecase and scenario.
   (b) Discuss how usecase based elicitation is done. Give an example. [6+10]
3. What is PSP? Also explain what is TSP ? Discuss their benefits. [4+4+8]
4. (a) What is a risk? What is the need of risk measurement? [6]
   (b) A software increment is delivered to end-users by a software team. The users uncover 8 defects during the first month of use. Prior to delivery, the software team found 242 errors during formal technical reviews and all testing tasks. What is the overall DRE for the project? [10]
5. (a) What is non-functional requirements? Give examples for it.
   (b) Explain the metrics for specifying non-functional requirements. [8+8]
6. (a) What is CK metrics suite? State and explain the six class-based design metrics for Object-Oriented systems. [10]
   (b) Discuss the MOOD metrics suit. [6]
7. (a) What is meant by software quality measurement? What are the things that are covered in SQA? [10]
   (b) Discuss the importance of quality assurance. [6]
8. (a) What is data design. Explain how is it done with examples.
   (b) Elaborate on architectural design elements. [2+6+8]
