

Code No: R05220501

R05

Set No. 2

II B.Tech II Semester Supplimentary Examinations, May 2010

SOFTWARE ENGINEERING

**Common to Information Technology, Computer Science And Engineering,
Computer Science And Systems Engineering**

Time: 3 hours

Max Marks: 80

**Answer any FIVE Questions
All Questions carry equal marks**

1. (a) What is meant by Design Structure Quality Index(DSQI)? Explain clearly how to compute it. [8]
(b) Discuss the metrics for Object-Oriented Design. [8]
2. Recommend the life cycle model(waterfall or evolutionary) for the following software systems.
a) Customer relations management
b) Supply chain management. [8+8]
3. What is meant by SQA? Discuss in detail SQA activities. [16]
4. (a) Discuss how feasibility studies is conducted.
(b) Why requirements elicitation and analysis is a difficult process? [8+8]
5. Discuss the key challenges facing the software Engineering. [16]
6. (a) Explain the terms “System perception” and “Implementation Model” according to interface design models. [8]
(b) State some guide lines that focus on information display and data input in user interface design. [8]
7. Discuss in detail how would you transform analysis model into design model. [16]
8. (a) Discuss the risk analysis and management template. [8]
(b) Discuss how to asses correctness, Maintainability, and Integrity of a software. [8]
